

## Welcome to the Chinese audio course

This audio course will teach you the most important words and expressions.

First you will hear the words in English. Then you will hear them in the correct pronunciation in the foreign language. This is followed by a pause, which you can use to say out loud what you have just heard. Don't be shy of really repeating out loud what you have heard. Anyone for whom this is awkward can of course initially do the speaking practice when no-one else is around. However, it is recommended that you later get a mother-tongue speaker to listen to you in order to refine the pronunciation.

It has proven to be worthwhile to listen to the course several times, preferably on consecutive days. This is the best way to imprint all the new vocabulary in your mind.

This audio course is very easy to use. The words and expressions are organised according to themes and summarised in chapters. Each chapter equals one track.

We wish you lots of fun and success in learning!
